HARRISON **HOGE** INDUSTRIES INC

# Panther Martin® Lures Since 1958

Over 129,000,000 Panther Martins sold and still counting!

**NEW SonicWhammy™**  
More Action For More Attraction!

## 66 Years On and Still Creating Great NEW Lures

This year, we are introducing 18 **NEW** Panther Martin® SonicWhammy™ lures shown above and on the next page. **NEW** Panther Martin® SonicWhammy™ lures feature a unique blade design that augments the attraction and fish catching capabilities of Panther Martin® lures. In addition, we are also introducing 56 other truly great **NEW** lures - **NEW** FishSeeUV™ SpikeADelic™, **NEW** SonicThumper™, **NEW** Single Hook Fly and **NEW** Single Hook Barbless lures - see pages 4-7. In doing so, we are further expanding the range of Panther Martin® Lures for anglers to catch more fish.

It is no idle boast to say Panther Martin® lures truly catch fish. Not only are the pictures in the back of this catalog showing the many kinds of fish that Panther Martins catch, but also the fact that we have sold over 129,000,000 Panther Martins proves that anglers choose Panther Martin® lures year after year in their quest to catch more fish.

We also continue to offer our tried-and-true Classic Panther Martin® lures. And to ensure they always keep catching fish, we continually test and monitor the quality of these lures to make sure they look and work as well as ever.

**Panther Martin™**  
**SonicWhammy™**

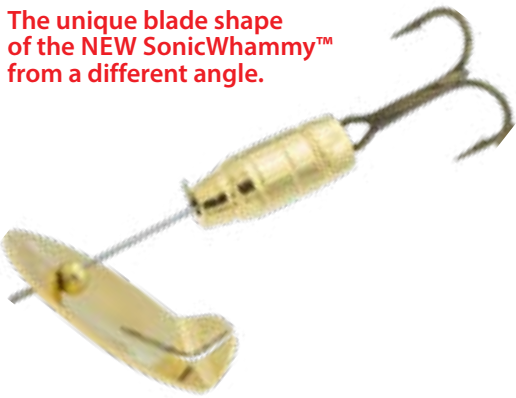

# NEW Lures for 2024

The **NEW** SonicWhammy™ series introduces a whole **NEW** blade shape that ups the sonic spinning and thumping action of our classic Panther Martin® blade. How so? The split at bottom of the blade creates 2 separate blade rudders that churn up and magnify the already great sonic action of our Panther Martin® blades. Additionally, because the split ends are bent down, they cause a thumping unique to this **NEW** blade design. Yes, more action creates more attraction.

Using our barrel style bodies plated with genuine gold and silver, these brass body lures cast like bullets and retrieve like a swirling dervish. The added sonic action and thumping sound is bound to attract a wide variety of fish...from trout to bass, from crappie to salmon...these action-packed lures are made for swift and secure hookups.

Available in our six most popular patterns & 3 popular sizes - 2, 4 & 6.

The unique blade shape of the **NEW** SonicWhammy™ from a different angle.

**Panther Martin**

**FishSeeUV™ SpikeADelic™**

# NEW Lures for 2024

Holy UV!!! In these bright and glowing **NEW** colors and patterns we have created some of the most outstanding **NEW** lure combinations possible. And again, as with all our UV patterns, there is a strong scientific reason the eye-popping colors and patterns will be truly effective. Fish see things with UV eyes. Therefore, when they see the **NEW** lures they are immediately caught and attracted to these unique color combinations.

And again, if you put these new lures under an ultraviolet light, you will be amazed how these already eye-popping colors are enhanced and glow. These lures are designed for Bass, Northern Pike and larger Trout in fresh water. They are also effective on Red-fish, Sea Trout, Snook, and many more in saltwater.

Because in bass fishing there is often a lot of vegetation where the biggest lunkers lie, we have outfitted these **NEW** lures with a special weed-guard to keep them weed-free. This also works in saltwater reeds and algae in bays or when offshore fishing.

Available in our 6 colors & 4 different sizes - 4, 6, 9, 15.

**Panther Martin**  
**SonicThumper**

# NEW Lures for 2024

In this series, we are focusing on Bass fishing and more specifically on catching Monster Bass. And yes, there are a lot of Bass spin fishing baits, but **Panther Martin® is different in that our exclusive and original Panther Martin® blade spins and thumps differently.** And why is that? Because Panther Martin® blades create a special sonic sound and thump that is proven to attract fish. So, get ready to catch more Bass. And get ready to catch big Bass.

The spinning action of the Panther Martin® blades are activated by small clear glass-like beads behind the first blade and a swivel in front of the second larger blade. Because the larger blade has 2 holes at the front - one to attach the blade to the swivel and one behind that where the shaft would normally go, it creates a bubbling effect that further adds to the sonic action of this **NEW** lure. The combination of these allows our great Panther Martin® blades to truly show off their stuff. And show off they will. Pity the poor Monster Bass who lived a long and full life only to be taken down by one of these irresistible **NEW** lures.

Panther Martin® SonicThumper™ lures feature polished Brass or Nickel-plated Brass blades for a super bright flashing effect when being retrieved. These blade combinations are further enhanced by different vibrantly colored hand-tied silicon dressings behind the traditional minnow head on the wire shaft. The combination of the unique Panther Martin® blades flashing in the water and the resulting sonic thump makes these lures irresistible to Monster Bass.

Available in 2 sizes - 6 & 9.

**Panther Martin**

**HybridHolographic™**

# NEW Lures for 2024

The **NEW** HybridHolographic™ series combines the flash of our genuine gold- & silver-plated blades with proven holographic bodies & super bright **NEW** ultraviolet dressings. The silky-smooth synthetic fibers of the full-bodied dressings have ZERO water absorption, so they stay fluffy even under water. That means the fish are presented with a fuller profile that makes them think they are about to gobble down the real thing.

If you look at the UV dressings under an ultraviolet light, you will be amazed by the brightness and glowing quality of the UV pink, blue, chartreuse, and white colors. Why is this important? Because fish have UV vision, and their eyes are attracted towards these ultra-bright and luminous **NEW** UV colors. This gives anglers **NEW** additional tools to stand out and attract fish. This also means these lures are particularly effective on cloudy days and in murky waters.

Available in our 3 most popular sizes - 2, 4 & 6.

# Panther Martin® Single Hook Fly

More and more sections of the U.S. are requiring single hooks and more and more anglers are switching to catch and release fishing. To reach out to longtime Panther Martin® customers who either want to switch to catch release fishing or who are required when fishing to use single hooks, we are offering **NEW** proven dressed patterns to expand our selection of single hook lures.

In the traditional single hook category, we are offering 2 **NEW** dressed fly styles. They use dressings that have always proved effective on Trout, Bass, and many other species. The gold blade with black body yellow dots is our most famous, most proven blade/body combination. The black fly pattern with the red fluffy hair are proven dressing colors. The gold blade yellow body with red dots is our second most popular blade/body combination. The brown-yellow fly with fluffy red tail is another unbeatable dressing combination. Put together, these **NEW** lures offer the angler and the fish with a safe and effective "catch and release" method.

Available in 2 of our most popular patterns & 3 popular sizes - 2, 4 & 6.

### PMRFSH-GBR

Single Hook Gold/Brown  
Sizes 2, 4, 6

# Panther Martin® Single Hook Barbless

With these **NEW** single hook lures, we have upped the "catch and release" game. Barbless hooks are far easier to remove from a caught fish and they make catching a fish far more sporting since it is easier for fish to get off a barbless hook when fighting on the line. This offers the angler in those areas requiring barbless hooks a truly legitimate solution to fishing in those areas. No longer will you have to crush down the barb and no longer are anglers still subject to being fined because the Game and Fish Warden feels they did not obey the letter of the law.

The long shaft single hook lures feature three of our very best and most effective color combinations. The Holographic Rainbow Trout blade and body pattern is our most effective and most popular holographic pattern, the gold and silver blades with black body/yellow dots and yellow body/red dots have been catching fish since 1958. So, catch and release anglers be assured these are our best and most effective patterns.

Available in our 3 most popular patterns and sizes - 2, 4 & 6.

# Panther Martin<sup>®</sup> InLine SWIVELS<sup>™</sup>

Panther Martin<sup>®</sup> InLine SWIVELS<sup>™</sup> change the landscape for spinning lures by providing integrated InLine swivels built in a straight line directly on the spinning shaft of the lures. This eliminates line twist and the need to tie on a swivel. It also maintains the tried, tested and true fishing action and profile of Panther Martin<sup>®</sup> lures. It is a new State-of-the-Art design that makes life easier for anglers.

In this InLine Swivel<sup>™</sup> series we are offering our most popular and most proven blade and body color combinations in our 3 most popular lure sizes. What makes these Panther Martins<sup>®</sup> so different and so unique is that they all have integrated InLine Swivels attached directly to the wire shaft of the lures. This allows these Panther Martin<sup>®</sup> lures to maintain the same great spinning action and the same great fish catching lure profile that Panther Martins<sup>®</sup> have always had. Better still, it provides the added ease and convenience of having the swivel already attached to the spinning shaft.

Unlike spinning lures where standard double eyelet swivels are attached to the front eyelet loop, these swivels are mounted directly on the wire shaft. As such, they keep the same original Panther Martin<sup>®</sup> lure profile. The fact that this InLine swivel system is in a direct straight line, makes these swivel lures work better than lures with a tied on double eyelet swivel. This also greatly reduces water resistance and weed snags. That makes the lures better and easier to cast and retrieve or troll while eliminating the chance that the swivel may impede the effectiveness of your casts or cause unneeded turbulence when retrieved or trolled.

Panther Martin<sup>®</sup> InLine Swivel<sup>™</sup> Spinners are available in 10 tried and true fish catching colors.

Panther Martin<sup>®</sup> available in our 3 most popular sizes - 2, 4 & 6.

# Panther Martin WillowStrike™ Spinners

A turbo-charged Panther Martin upgrade of the Classic Willow Blade using our original shaft through the blade design with Panther Martin's unique convex/concave shape provides a super fast spinning action without a clevis.

The same great spinning and sonic vibrations as our original Panther Martin blade, but in a Willow blade profile. Genuine Gold & Silver plated and Holographic blades provide maximum flash. This Willow blade series is extremely effective in shallow waters as the Willow blade profile generally runs higher than the traditional Panther Martin blade. Irresistible to Trout, Bass, Salmon and many more species.

## Panther Martin® MiniFly™

Panther Martin® MiniFly™ adds a weapon in your fishing arsenal to get those smaller Trout and Panfish that are just waiting for something small enough to munch on.

The Panther Martin® MiniFly™ series combines a smaller size body and blade with some of our best-selling Fly patterns to provide a way to catch smaller fish. Using the unique convex/concave Panther Martin® style blade in a smaller size blade & body, this lure opens up fishing in smaller streams to get the smaller fish that are so elusive. The Panther Martin® MiniFly™ series gives the same great spinning action and sonic vibrations of your favorite Panther Martin® Spinners to drive fish crazy. Truly effective on Trout, Crappie, Sunfish and Panfish. Available in size - 0M - 1/48 oz.

## Panther Martin<sup>®</sup> FishSeeUV<sup>™</sup> Hammered Spinners

Panther Martin<sup>®</sup> FishSeeUV<sup>™</sup> lures have caught the attention of fish nationwide.

Fish see colors as if they were under a black light. These lures are truly eye-popping the way humans see them, but if you put them under a black light you will be amazed at the way the UV colors on blades and bodies stand out and call out to passing fish.

Deadly on Trout, Panfish, Bass, Walleye, Perch, Pike, Pickerel and wide range of other species.

# Panther Martin® Stinky Garlic & Stinky Anise Scented Hammered Spinners

**FISH LOVE THEM!**

## What are Panther Martin® Stinky Garlic & Anise?

Panther Martin® Stinky Garlic and Stinky Anise Lures are a deadly combination of the natural attraction of scent and the unequaled spinning action and vibration of Panther Martin lures. Not only do they attract fish from long distances, they also mask the human scent that would normally get on the lure.

## What makes Panther Martin® Stinky Garlic and Stinky Anise Lures different from others?

Panther Martin® Garlic and Anise Scented Lures use a proprietary blend of 100% natural scent applied in a bulb at the base of the treble hook. These water activated scents are applied to each hook as a durable finish, giving the hook a distinct and very powerful Garlic or Anise scent.

## How long does the scent last?

Depending on fishing situations, Panther Martin® Stinky Garlic and Stinky Anise Lures will disperse their scent over the course of an average fishing season. Because the scent is water-activated, fish will still be able to smell the strongly scented hook even when we may not.

## Unique Features of Panther Martin® Stinky Hammered Spinners

- Stinky Garlic & Anise Scented Mustad® Hooks
- Hammered Blades Reflect More Light
- Powerful Sonic Vibrations Call To Fish
- Generously Coated with Long Lasting & Durable Natural Garlic or Anise Scent Bulb

All Gold & Silver blades are Genuine Gold or Silver plated.

# Panther Martin® Two-Tone Roe™

## Panther Martin® Two-Tone Roe™ featuring Hammered Holographic Blade with dazzling painted back and Salmon Roe Body.

These classic treble hook lures provide more reflection in the water combined with dazzling holographic patterns. The Salmon Roe body provides a different profile for lake stream fish.

The hammered blades are painted on both sides to add more flash to these lures. Double the attraction and double the action!

Great for Trout, Bass and many other species.

# Panther Martin® FishSeeUV™

## Lures The Fish Will See & Strike

Panther Martin FishSeeUV™ lures have caught the attention of fish nationwide.

The scientific premise of UV lures is simple - fish see colors as if they were under a black light. These lures are truly eye-popping the way humans see them, but if you put them under a black light you will be amazed at the way the UV colors on blades, bodies and Salmon egg beads stand out and call out to passing fish. This makes these lures particularly effective on cloudy days or in murky or muddy waters.

Holographic  
Spotted Blue Red Hook  
Sizes 1, 2, 4, 6, 9, 15

It's no secret that fish are attracted to the color red. It has been proven that adding the color red to already effective fishing lures makes them more effective. Red is the color that makes fish strike because it suggests feeding. When feeding, the gills of the fish become engorged with blood, known as "Gill Flash".

## Panther Martin® Go-Glo™ Flash-A-Bou

### Double The Attraction To Double The Action!

Our Panther Martin Go-Glo™ lures attract fish two different ways. Go-Glo lures flash bright colors and glow by themselves in shallow or deep waters. The Go-Glo™ paints are far brighter than traditional glow paints and glow far longer than traditional glow colors.

They are formulated with a high concentration of glow in the dark and UV pigments. This results in a finish that reflects UV light and emits its own light in murky, deep or dark water conditions.

And that is not the only benefit of these unique Go-Glo™ lures. The Flash-A-Bou iridescent fibers create an added flash and reflection around the hook and hold their shape as they are retrieved through the water, giving these lures a natural minnow action as they run through the water.

The combination of the Go-Glo™ colors and Flash-A-Bou fibers give these Panther Martin lures two powerful added attractants to catch more Trout, Bass, Perch, Pike and Pickerel. Available in 7 colors and 3 sizes

# SonicStreamers™ are Screammers!

## 10 Colors, 3 Sizes

We've combined the life-like action of the perfect streamer with super flash and sonic pizzazz!

Wowie Zowie, these Panther Martin® Sonic Streamers™ are a dream to fish. Featuring full-length hair and feathers that allow them to flutter on descent and respond like a streamer fly with the added flash and vibration of a spinner blade. These amazing lures respond instantly to the slightest movement of your rod tip during the retrieve. The smoothness and silkiness with which they move through the water, along with their flash and sonic signals, virtually guarantee vicious strikes. Designed so the feather and hair ride atop the bright metal body leaving the treble hook hanging free. Ideal for trout, bass, pike walleye and more.

Available in sizes 6, 9 & 15.

**“The Greatest Fish Catcher of All Time”**

### The Perfect Blend of Flash, Sound & Vibration

1. Double reverse concave-convex blade attaches directly “through the shaft”. This unique design maximizes water flow over the blade to produce a blade rotation that genuinely imitates living creatures that fish feed on.
2. Genuine gold, silver & copper-plated blades reflect more light thereby attracting more fish.
3. Constant 40-degree angle of blade is always in balanced position making it easy to cast with perfect motion- even on upstream casts!
4. Heavy weighted deluxe and tear-drop bodies cast further and sink deeper to where the fish are.
5. Razor sharp hooks catch the fish and keep them hooked!
6. Blade rotation creates vibrations which sends out hydro-sonic waves that “call to the fish”, even when they can’t see them.

### General Fishing Tips for Panther Martin® Spinners

Use a balanced ultralight rod and reel. We recommend a ball bearing reel having a 6:1 retrieve weighing around 8 oz. with a smooth drag and a long spool. It is important to have a small diameter, soft line with adequate tensile strength. We recommend 4-6 lb. test.

#### Lake Fishing

Use a “countdown” system. Cast out and count the lure down to different depths before retrieving. When trolling use either a weighted line or a down rigger to get to the preferred depth, usually around the thermocline (area of greatest temperature change). Once you get a strike, keep fishing at that depth. Inlets, outlets, springs, drop-offs and weeded areas often hold the majority of fish.

### Stream or River Fishing

**Upstream fishing** - Here you must contend with water pushing your lure back to you. Change the speed and the depth of your retrieves. Keep a low profile on the water by bending over or kneeling because the fish will be swimming towards you when chasing the lure.

**Downstream fishing** - Here you vary the depth and the speed of the lure simply by raising or lowering the rod. The current allows you to make multiple approaches without re-casting.

**Cross stream fishing** allows you to have the best of both worlds. You can cover more area while not “spooking the fish.”

**WARNING:** These products can expose you to chemicals including lead and lead compounds, which are known to the State of California to cause cancer, birth defects or other reproductive harm. For more information, go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

# Panther Martin<sup>®</sup> HolyRoe<sup>™</sup>

**HolyRoe<sup>™</sup> featuring Hammered Holographic Blade with dazzling painted back, Salmon Roe Body with McFlyfoam Egg and Egg Yarn trailer.**

These Salmon and Steelhead versions come in larger sizes and feature McFlyfoam eggs and fluffy egg yarns to allure the biggest Salmon & Steelhead. When wet, egg yarn retains its full shape and flutters seductively in stream, river or lake as it is being retrieved. A unique added feature of these lures is that the backs of the blades are painted for double the attraction and double the action. Scents can be added to the McFlyfoam eggs and egg yarn trailers making them even harder to resist.

Available in 3 sizes - 12L, 15L, 18L.

# Panther Martin® Lil' Curly WeedRunners™!

**They Wiggle, They Spin, They Call to the Fish!**

Panther Martin® WeedRunner™ lures have been gaining popularity since their introduction. We decided to add curly tails to smaller sizes to give new and interesting swimming action through the water. These lures are bound to be particularly effective for trout and bass. Best of all, because the hook is buried in the plastic tail, these lures are, like their larger cousins, totally weedless. That means they can be fished in heavy vegetation and weeds where lunker bass and trout lurk.

# Panther Martin WeedRunner™

## Panther Martin's first truly weedless in-line spinner catches both fresh and saltwater fish!

This weedless in-line spinner is a first for us in a couple of ways. One, it is truly weedless because the hook is buried in the fluke/shad style soft plastic tail. Two, these lures catch both fresh and saltwater fish. This in-line spinner is truly a universal lure that will work in all parts of the U.S., whether you are fishing weed infested lakes for Bass and Pike or saltwater flats for Redfish, Sea Trout and Snook. The WeedRunner™ is an in-line spinning lure that loves to find fish in vegetation and timber.

Outfitted with a Mustad® 4/O Black Nickel, Opti-Angle Needle Point, Offset Shank, Extra Wide Bend Hook, buried in a fluke/shad style tail and comes with one extra tail.

Available in 2 blade colors (Gold & Silver),  
8 tail colors and 2 sizes - 3/8 oz., 1/2 oz.

# Panther Martin® HulaRunner™

**HulaRunner™ Weedless In-Line Spinner with enticing "Hula Skirt" and realistic minnow head body catches Bass, Northern Pike, Redfish, Sea Trout, Snook and many more.**

The "Hula Skirt" provides a large, colorful profile while the blade provides plenty of flash. This weedless in-line spinner features an enticing "Hula Skirt" and realistic Minnow head body.

Weedless hook allows this spinner to be dragged through reeds, weeds and other fishy vegetation. The free swinging hook prevents fish from gaining leverage and breaking free... so strikes stay on.

**All Frogs float with their eyes just above water - Just like a real frog!**

**Size Chart**  
Size 3 - 3/8 oz.  
Size 5 - 5/8 oz.

## Unique Superior Frog Features

- High-density outer body provides extra weight for longer casts even into the wind with greater contact control during retrieve.
- Low-density inner core provides extra consistent, permanent flotation - these frogs will never sink or become waterlogged.
- Casts 70-90 feet and always lands on its belly.
- Floats with eyes just above the water.
- Lifelike kicking action of legs drives Bass crazy!
- Natural soft plastic body shape makes these irresistible to Bass!
- The Weedless hook goes through the thickest vegetation and is pointed down - where Bass come from!
- Deadly Attraction - catches Bass just floating in lily pads or weeds.
- Superior Frog is also very effective for catching Northern Pike!

# Panther Martin<sup>®</sup> High Lake Trolls

This is the more classic approach to High Lake Troll Rigs. But of course, we never do anything completely traditional, so instead of having a plain plastic rudder and traditional blade, we created a holographic plastic rudder with eye-popping holographic colors. These High Lake Trolls come complete with a single hook to outfit your favorite live bait. Our Panther Martin blades create a unique spinning action which make them a more effective fish attractor than traditional style Lake Troll Rigs, which usually use a clevis to attach the blades. Simply put, these Lake Trolls start spinning sooner, send out sonic vibrations that "call to the fish" and are far more effective than others on the market, especially on really big lake Trout & Kokanee! They are particularly popular in the California, Montana, Colorado, Oregon & Washington states.

# Panther Martin<sup>®</sup> Bearded Banshee<sup>™</sup>

**Bucktail Spinner Bait designed for Large and Smallmouth Bass, also great for Northern Pike, Walleye, Panfish and other species!**

This natural hand tied Bucktail Spinner Bait is designed specifically to catch Large and Smallmouth Bass, but like many other Panther Martins these lures also work great for Pike, Walleye and Panfish.

Our unique Panther Martin<sup>®</sup> blade spins on the free floating sonic arm with bearing bead and creates extra vibration not found in other spinner baits. Another unique feature of the Panther Martin<sup>®</sup> blade is the spinning action that allows this lure to helicopter down into a free fall.

Outfitted with a Mustad<sup>®</sup> 1/O Black Nickel Opti-Angle Needle Point, Round Bend Hook on size 1/8 oz. and Mustad<sup>®</sup> 2/O Black Nickel Opti-Angle Needle Point, Round Bend Hook on sizes 1/4 oz. & 3/8 oz. Each lure is outfitted with a hand-tied Bucktail jighead body.

Available in 6 colors, 2 sizes - 1/8 oz, 1/4 oz.

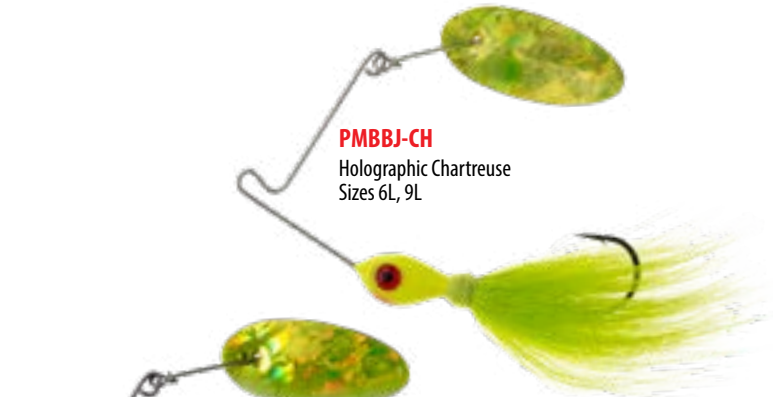

*The secret of the Bearded Banshee is its free floating sonic arm which features a bearing bead on the inside of our unique convex/concave blade (shown above) allowing the blade to spin freely and easily. The free floating sonic arm also creates more vibration and attracts fish from even further away!!!*
